

## IN SESSION NOTES

PROJECT 8003

SESSION CCC13

DATE: 6 MAR 80

TIME: 0900

PREIM:

Quing data: RVer was informed prior to the session that he ~~had~~ had provided very good and verifiable information during CC87. He was informed he would be directed to return to the area of manufacturing and coal ore conveyors he had previously seen, and would then be guided east. He was not to involve himself in minute descriptive detail during his movement, but ~~would~~ was rather to give quick descriptions and continue movement, preferably at an altitude of 500'(+).

45 seconds into session a drill starts!!

#1 storage tank shapes - dress r. dress

L 2 min missed.

like a

#2 +10 " big rubber belt - over roller - metal cleat on it  
sheet iron buildings

#2A multiple steam lines on stands abv ground!!

+12 likely its a power plant with steam lines and conveyors

+13 Fred sends him E. for first time

looks like a ~~ore~~ pile?

Approved For Release 2000/08/07 : CIA-RDP96-00788R000200540003-9  
by per [unclear] not  
Coal - its a pile of iron ore or limestone

~~E. one more~~

\* +15 on a shady side of a big bldg  
 abandoned tractor tracks - big metal belts  
 coiled up next to bldg - some double  
 backed once.

E. one more

#3 \* +20 metal stacks - like painting stacks to  
 exhaust hydrocarbons high above plant  
 long metal buildings

\* flash of ~~the~~ coal or ore unloading in  
 this vic.

E. one more

\* +22 to L (N.) its shape remind me of sus-  
 pension bridge shape  
 to R is glowing again

\* lot of pipes laid out parallel like  
 printed circuit boards (only 1000s of  
 times bigger)

+25 a face superimposed over pipes -  
 just geo. Washington then stache

E. one more

On ground - up in air

\* +28 a marshalling yard / trains

\* a big brick stack below  
 parallel long buildings to S. of stack

E. one more time

\* little more sparse to L. things on posts like  
 insulation

#A +34 Jorden spray column - more than one  
!! water cooling plant.

\* apt. shapes to S.

One more time

# # seemed him of inflatable plastic inclosure  
to R. - its smooth  
~~one~~ all kinds of things  
small piles of debris

Complex over lapping cone shapes  
Some kind of test

parallel linear pattern coming in from great distance

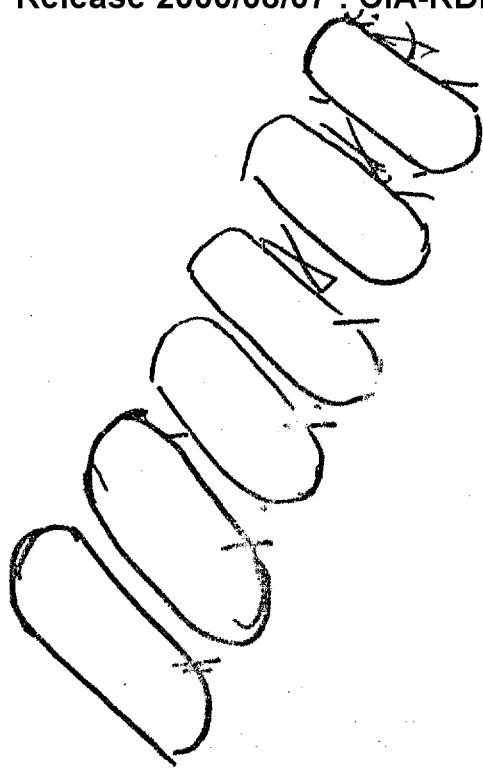

A +45 big rounded tanks - vertical pipes  
smaller tubes coming up and turning  
south - emitting gas or steam  
high pressure - w straight spreading  
linear pattern

Several vertical tube shapes in row  
 $H = 1.5$  times diameter

AA RR spin loops or cable laid out

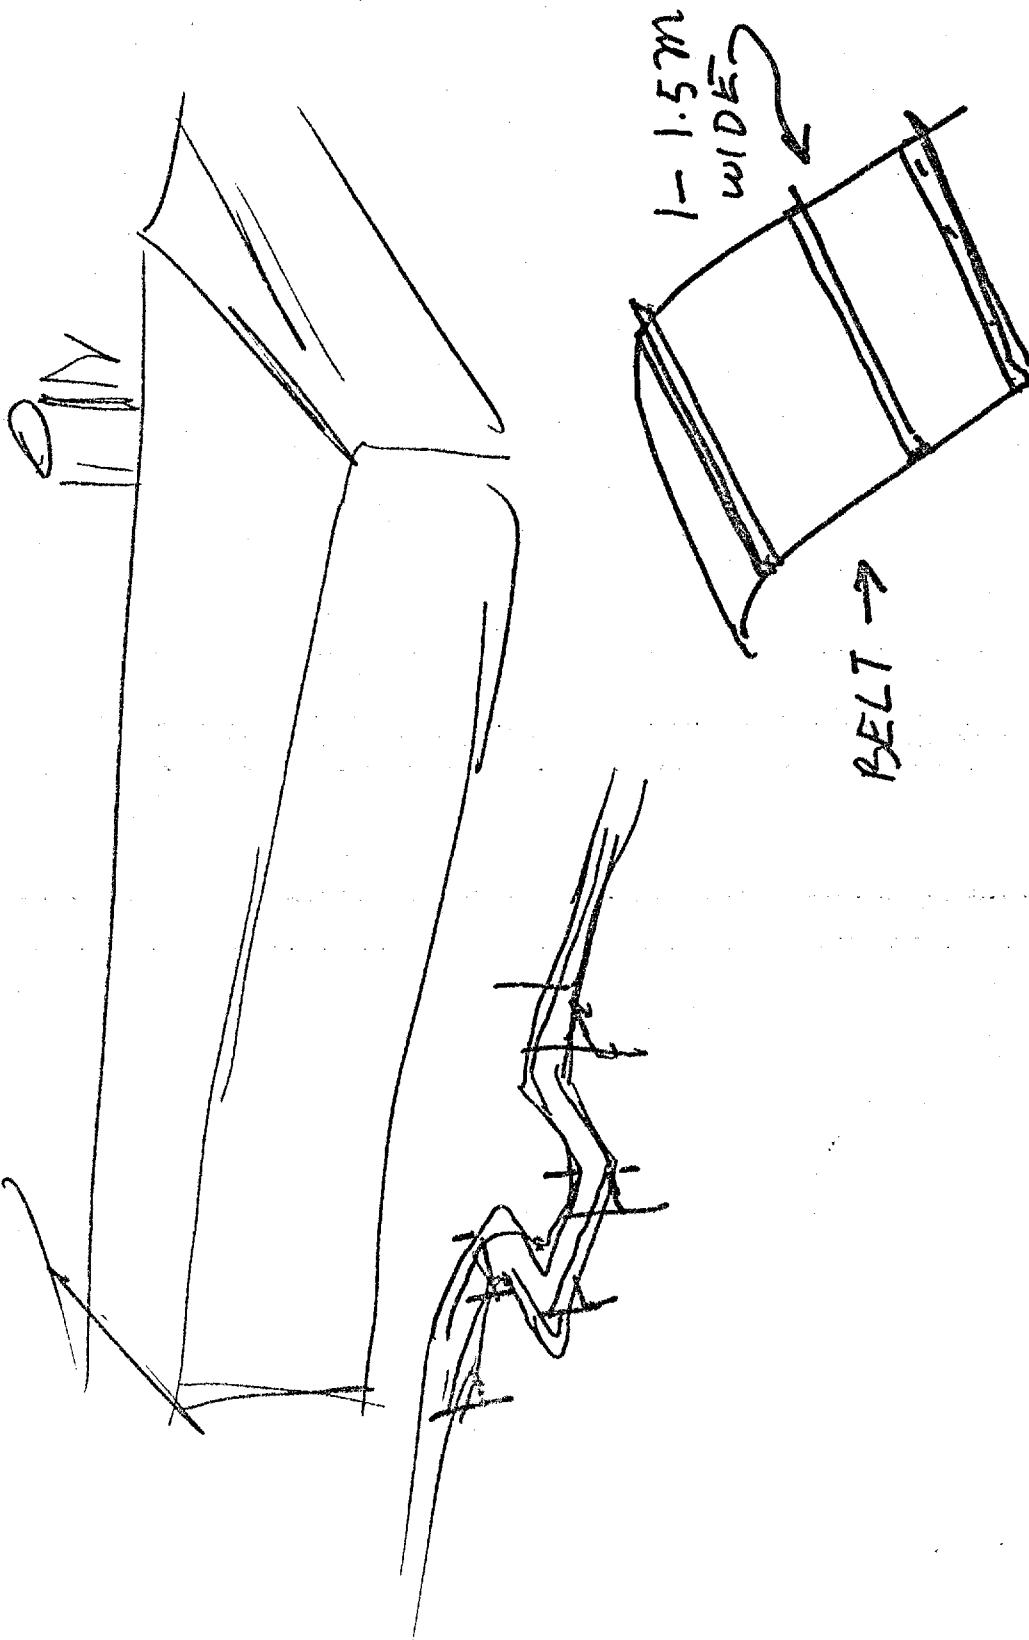

+ 47 HF shaking
